Stealing a Plate

"I don't think it is fair," cried Net tie Bourn. "To think that one horrid old plate should make all this trouble! It was mean of Uncle John to make a will like that."

"He didn't make a will like that," contended Harry Warren. "How was he to know that one of the plates should be broken between his death and the reading of the will? He was fair enough. He left one to your mother and one to my father. Su that was a fair division of the two. His intention was all right."

"Well, then," said Nettle, stamping a very pretty little foot, "it's shame-ful that our parents should be so hormiserable old piste!"

"You can't blame them, exactly," defended Harry, charitably.

"And in the meantime we can't even announce our engagement," walled Nettle, "to say nothing of get-

He smiled down into the worried 576 little face, but found no answering smile. Ever since Jason Pomfret's will had been read, and it was found that the two famous Washington plates were left to his brother, Silas Warren, and to Martha Bourn, there 579 had been a bitter warfare waged be-580 tween the two legatees. In the bustle 580 of preparing for the funeral one of the plates had been broken beyond the skill of the most expert mender to put together, and Mrs. Bourn and mad on the subject of china, had taken the matter into the courts, each insisting that the remaining plate was the one Jason Pomfret had repeated 586 ly indicated as the one he wished the claimant to have.

But Harry did not let the grass grow under his feet. He went to see his closest friend, Dick Lyons, whe was noted as an expert in old porce lains. He had done Dick a great favor once, and Dick did not hesitate a moment. He managed to meet Mrs. Bourn at an evening party.

worst of this row over that Washing ton plate," he said when he had aroused her curiosity sufficiently. "I've often studied that collection of Jason Pomfret's, and other experts had always agreed with me that his Washington plates were not genuine." "Don't tell me that," she con ed with a sniff. "I've seen the plate s bundred times and I know very well that it is a real Weshington."

"Look here," suggested Dick. "You can look the plate over closely so long as you don't take it out of the execu tor's office. You've seen it a hun dred times, but you never looked at it with doubt because you took it for granted that it was what Pomfret said it was. You look it over careful ly and you'll get the credit for drop ping the fight over a plate that is not worth fighting over."
